

How it works

inLIFE
SOLUTIONS

A quality **Website** that works for you with measurable **results**

Hosting with essential **Support** and **security**

Technology moves pretty quickly, so staying on top of the latest website CMS and plug-in updates keeps your website performing at its best. On top of this, ensuring your website has the latest important security updates goes a long way towards keeping your on-line data secured.

We make it easy

- 1 We discuss your needs and plan your project either from one of our custom packages or a bespoke solution to suit you.
 - 2 We provide static design samples with a design approval process to ensure you are happy with the look and feel of your new website.
 - 3 We develop your site on a sample server for live testing, you can then add content and iron out any creases before switching your site live. We guide you every step of the way!
-  We submit your website to search engines and then track your progress over the first month. With our hosting support packages we also provide ongoing updates and security. We also offer ongoing support and SEO packages for continued growth.

All websites include :

- ✓ Dedicated inLIFE web project manager & project plan
- ✓ Custom design & development
- ✓ Mobile responsive design
- ✓ Design approval process with approval with around 4 x redesigns if required
- ✓ Fully working website preview on testing server
- ✓ Content Management System to edit your own content
- ✓ One hours tutorial on using your Content Management System at inLIFE HQ
- ✓ The latest coding and usability standards
- ✓ SEO friendly and future proof development
- ✓ Unlimited news pages (if required)
- ✓ A single .co.uk domain name free
- ✓ Conforming to web usability guidelines
- ✓ Search Engine Submission

What else you get... and don't get!

- ✓ Unlike many agencies, we ensure your website is fully owned by you. We sign over all design rights and ensure domains are registered in your own company name.
- ✓ We provide you with a content management system and free one hour tutorial so you can easily update your own content when required. We are always here for ongoing help and advice too.
- ✗ We do not provide general I.T support such as setting up emails or any support on your personal computer, however we can point you in the right direction.
- ✗ We do not provide any copy-writing service, photography, stock images or video filming within the price, however we can help provide this as an addition if required.
- ✗ We do not provide ongoing web software and web security based updates as standard with the entry level Premium Hosting but we do have additional options for this.
